<b>1.23</b>	<b>Renewable raw materials</b>
Perfumes are exempt from this requirement	

<b>1.23</b>	<b>Renewable raw materials</b>
If there is a secrecy agreement between the Licence holder and the producing company, we accept that it is the producing company that has the required knowledge of renewable raw materials.	

<b>1.29</b>	<b>The precautionary principle</b>
Clarification: "...the higher toxicity value..." refers to the value indicating the highest degree of toxicity	

<b>1.30</b>	<b>Languages</b>
<p>In the countries listed below the following languages must be used (alone or together with other languages).</p> <p>Sweden: Swedish</p> <p>Norway*: Norwegian</p> <p>Finland: Finnish</p> <p>Denmark*: Danish</p> <p>Estonia: Estonian</p> <p>Latvia: Latvian</p> <p>Lithuania: Lituanian</p> <p>* In Norway and Denmark it is accepted to use a common text, where only the words that differ, or can not be understood between the countries, have been translated.</p>	

<b>9</b>	<b>Colouring agents</b>
Since tartrazine (CAS number 1934-21-0), according to many registrations in ECHA's C&L inventory, is classified with H317 (May cause an allergic skin reaction) it is not approved for use in Bra Miljöval labelled products.	

<b>12.1</b>	<b>Enzymes</b>
Enzyme stabilizers classified with H317 (May cause an allergic skin reaction) must not exceed 0.01% by weight in the final product (e.g. a laundry detergent). Please note that the exception for enzymes in requirement 1.12 does not apply to stabilizers.	

<b>14</b>	<b>Other additives</b>
Denatonium benzoate (CAS number 3734-33-6) is approved, despite low biodegradability, when used for denaturing in accordance with the Commission Implementing Regulation (EU) 2017/1112, Annex, clause II, i.e. 1.0 gram denatonium benzoate/hectolitre of absolute ethanol.	

<b>14</b>	<b>Other additives</b>
Tetrasodium etidronate (CAS number 3794-83-0) may be used as a processing aid in the synthesis of ingredients, at a maximum concentration of 0.2 % by weight, provided that the concentration in the final product, e.g. a laundry detergent, does not exceed 0.02% by weight. However, tetrasodium etidronate may not be used as an ingredient in the recipe of the final product.	

<b>17</b>	<b>Dosage and user information for automatically dispensed products where the dosage is set by the license holder's representative</b>
<p>Automatically dispensed products where the dosage is set by the license holder's representative are, as mentioned in requirement 17.1, exempt from the requirement that information about the recommended dosage must be present on the label and the product information sheet. Consequently, such products are also exempt from the product-specific requirements relating to the dosage.</p> <p>However, the following phrases are mandatory:</p> <p><u>Powder laundry detergents for consumer use:</u> "Consider the environment: Always wash a full load" or similar text</p> <p><u>Powder laundry detergents for professional users:</u> "Consider the environment: Always wash a full load" or similar text</p> <p><u>Liquid laundry detergents for consumer use:</u> "Consider the environment: Always wash a full load" or similar text</p> <p><u>Liquid laundry detergents for professional users:</u> "Consider the environment: Always wash a full load" or similar text</p> <p><u>Dishwasher detergents for manual dosing:</u> "Consider the environment: Always wash a full load" or similar text</p> <p><u>Dishwasher detergents form automatic dosing:</u> "Consider the environment: Always wash a full load" or similar text</p>	

<b>17.2, 17.30, 17.35</b>	<b>Dosage for different water hardness levels</b>
For fabric softeners where the dosage is the same for different water hardness levels and this is clearly indicated on the packaging, requirements 17.2, 17.30 and 17.35 have been cancelled.	

<b>17.4</b>	<b>Dosage and user information</b>
Ready-to-use windscreen washer fluids are exempt from requirement 17.4.	

<b>17.46-17.48</b>	<b>Dosage, washing-up liquids</b>
--------------------	-----------------------------------

Note: This text is a translation. The original Swedish text always prevails.

For products sold in spray packages, requirements 17.46-17.48 have been cancelled.

<b>18.3</b>	<b>Emissions to air from pulp production</b>
Exemption: Until May 1, 2021 the following applies: Emissions to air from pulp production should on average be a maximum of: 2.0 g of sulphur dioxide per kg of pulp and year 3.0 g of nitrogen oxides per kg of pulp and year	

<b>18.4</b>	<b>Emissions to air from production of fibres</b>
The requirement: "Emissions to air from production of fibres, should on average be a maximum of: 25 g of sulphur dioxide per kg of fibre and year" has been replaced with the requirement: "Emissions to air from production of fibres, should on average be a maximum of: 12.5 g of sulphur per kg of fibre and year"	

<b>18.4</b>	<b>Xanthogenate-based viscose processes in a non-closed system</b>
Exemption: Until May 1, 2020 the following applies: The requirement that potassium sulphate, sodium sulphate and hydrogen sulphide must be recovered to at least 80% has been cancelled.	

<b>19.6</b>	<b>Labelling of plastic packaging</b>
For soft plastic packaging sold in the Nordic countries you can write information about the plastic in a text on the label, instead of using DIN 6120 or American SPI.	

<b>19.7</b>	<b>Paper labels</b>
Paper labels consisting of only new raw material is accepted, provided that 100% of the raw material is FSC certified.	

<b>19.7</b>	<b>Large packaging for laundry detergents</b>
Paper and cardboard packaging intended for laundry detergents with a package size of 10 kg and above may contain down to 50 % wood fibers from recycled raw materials, provided that both the new and the recycled raw materials are FSC certified.	

	<b>Application, approved ingredients and chemical substances</b>
In several sections of the application form, the applicant should answer whether or not an ingredient or a chemical substance has previously been approved by Good Environmental Choice. We would like to	

clarify that this refers to ingredients/substances that have been assessed and approved according to the current criteria (from 2018), not the previous ones.

	<b>Application, origin of raw materials</b>
--	---

Please notice that the origin of raw materials (fossil/renewable) may differ even though the trade name and chemical substances are identical. The same applies for the certification level of oil palm-based ingredients. Hence, Appendix F (Origin of raw materials) and Appendix H (Raw material from the oil palm) should be filled out for each application.

	<b>Test guidelines</b>
--	------------------------

EU Method C.1. can be used when no data according to OECD 203 is available.

EU Method C.2. can be used when no data according to OECD 202 is available.

EU Method C.3. can be used when no data according to OECD 201 is available.

	<b>Licence Terms and Conditions, Special Terms and Conditions 01.03.2018, paragraph 5.1.2</b>
--	---

Where a Licence Holder submits Applications for several Licences at the same time for Products included in the same Product Line, a volume discount on the Application Fee is possible also if some products belong to the criteria for Bra Miljöval Cosmetics.
