

E Wet processing – recipes

The company applying for license for Good Environmental Choice (Bra Miljöval) shall before Part E is sent to the production unit using textile chemicals and dyes in the wet processing, enter their own company name and the name of the product/product group the material(s) is related to.

Name of the company applying for license
Name of product/product group concerned by the below information

**Part E is filled in by the production unit using textile chemicals and dyes in the wet processing.
The Licensee shall attach requested certificates and other documentation.**

By request of the Swedish Society for Nature Conservation, the production unit must be prepared to provide documentation that verifies the information stated in Part E.

A textile chemical or dye is defined as an element, chemical compound or a mixture of these. All textile chemicals and dyes have commercial names.

Wet processing means that the textile material has been further refined e.g. through bleaching, dyeing, printing, softening etc.

Textile chemicals and dyes used in the production of the licensed product/product group must fulfil the criteria in Good Environmental Choice - Textiles 2012. This text is a translation. The Swedish version always prevails.

Company name of production unit

Chemicals and dyes contained in recipes

For the wet processing steps where chemicals and dyes are used in processing of textiles, information about recipes used must be attached. This information can be sent directly from the production unit to the Swedish Society for the Nature Conservation without the licensee acting as intermediary.

In the event of an inspection the production unit must be prepared to provide the Swedish Society for Nature Conservation, current recipes, to ensure that no chemicals other than those declared are used.

Part of production:

Production of yarn	Printing
Production of fabric	Finishing, (impregnation, coating, lamination)
Pretreatment	Treatment of garment
Dyeing	Treatment, other

Example of division of textile chemicals and dyes (main function):

Oil for spinning knitting etc	Detergent	Stiffening agent
Warp size	Bleaching agent	Softener
Enzyme	Salt	Resin
Wetting agent	Optical Brightener	Wax
Anti-foaming agent	Dye	Coating paste
Surfactant, other	Pigment dye	Adhesives, binding agent
pH-adjuster	Binder for printing	Other additive
Complex agent	Thickening agent	
Acid	Alkali	

Information about contents of recipes

Below table is available as a separate part, Appendix Part E.

One table must be completed for each stage of production (see breakdown on previous page) and all the textile chemicals and dyes contained in the product must be declared.

The table shall indicate commercial name, supplier, the main function of the textile chemical / dye, and in which processing stage it is used. Enclosed safety data sheets (MSDS) and parts of the application documents which contain information about each individual textile chemicals / dyes shall be indicated in the table.

In those cases where GOTS-approved textile chemicals and dyes are used, certificates must be attached. In order to qualify for Good Environmental Choice Class I, Part J1.1.2.1 and the document that information in that document is based on must have been completed and attached.

If several different suppliers are used, the textile chemical/dyes must be entered into the table several times.

Commercial name	Supplier	Main function	Type of process stage	SDS	Part F	GOTS	Part J1.1.2.1
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Responsible person at the production unit must in the following lists verify that information is valid for licensed product/product group.

Pre-treatment							
Commercial name	Supplier	Main function	Type of process stage	SDS*	Part F*	GOTS*	Part J1.1.2.1*
				<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
